

Granite. Easy to install and even easier to maintain.

Installs in minutes...

1. Position marker, then cut around perimeter using your foot to brace

2. Remove marker and cut turf diagonally from corner to corner.

3. Remove sod pieces and any excess material, making sure to not damage outside edge.

4. Clear and level soil to a consistent depth of 2.25"

5. Ensure granite marker is level and positioned firmly in the ground.

6. For regular maintenance trim edges using regular garden shears/scissors.
